Forty years of jute, brought to the global stage

TexoFibre Global is a Kolkata-based manufacturer and exporter of jute, cotton, juco and canvas bags. For 40+ years we have worked closely with raw jute — understanding its grades, its fibre quality and its sourcing from the ground up. Today we bring that experience to the global stage, manufacturing premium natural-fibre products for buyers worldwide.

Our products help businesses move away from disposable plastic packaging with solutions that are responsibly made, consistently reliable and commercially relevant. We combine long-standing fibre expertise with modern manufacturing, customisation and export capability.

We supply promotional companies, packaging firms, wholesalers, importers, supermarkets and retail brands, with export documentation — certificate of origin, GRS certificates and phytosanitary paperwork — handled in house.

40+ years Raw jute sourcing & quality inspection	107 styles Jute, cotton, juco, canvas & non-woven
DDP pricing Quoted to your delivery point	In-house Weaving, printing, stitching, design

Printing techniques

- Screen printing
- Transfer printing
- Four-colour process screen printing (CMYK)
- Digital printing
- Embroidery

Bespoke service

- Fabric, gusset, handle style and length
- Lining, inner pockets and closures
- Body dyed to any Pantone reference
- Printed or dyed gussets, edge-to-edge print
- Rivets, grommets, zippers, woven labels

Artwork guidelines for jute

- Avoid photographic or four-colour process prints
- Avoid gradients and drop shadows
- Minimise white or pale colours on jute
- Avoid reverse text wherever possible
- Minimum 22px font size for text on jute

How to read a listing

Every style shows the fabric and weight, the finished bag size, the maximum screen print area and the carton quantity.

Bag size is given as height × width + depth (h × w + d) in centimetres. Depth appears only where the bag has a gusset; **T-Gusset** marks a tucked bottom gusset.

Carton quantity is indicative and varies with print coverage and packing method.

Fabrics in this catalogue

- Jute — laminated, non-laminated and starch stiffened
- Cotton — 4.5oz to 5oz, conventional, organic and Fairtrade
- Canvas — 8oz to 16oz, natural, dyed, yarn dyed and laminated
- Jutton & juco — jute and cotton blends
- Non-woven PP and rPET

Every style, A to Z

Requesting a quotation

Send us these six details and we will come back with a DDP price to your delivery point, along with lead time and sampling options. Minimum order quantities on bespoke bags depend on the design and materials chosen.

Style The catalogue code, or a reference bag	Quantity Order quantity per style and colour	Print colours Number of colours in your artwork
Print sides One side, both sides or gusset	Delivery date Date required in your warehouse	Delivery location Port or door address for DDP rates

A note on specifications

All sizes are in centimetres and are given in one consistent format: height × width + depth (h × w + d), with the depth shown only where the bag has a gusset. T-Gusset marks a bag with a tucked bottom gusset. Screen print areas are the maximum printable panel. Carton quantities are indicative and vary with print coverage and packing method. Prices are quoted on application.

Let's build your bag

Bespoke service: you imagine it, we'll create it.
